PROFESSIONAL SUMMARY

Fullstack Engineer with 6+ years of experience delivering interoperable government, aviation, finance, insurance, e-commerce, and data platforms. Builds secure backend and frontend systems, REST and SOAP integrations, and reliable data workflows. Integrated 10+ government institutions, maintained approximately 99.9% service uptime, reduced cross-system data inconsistencies by approximately 30%, and supported 350+ government operators.

TECHNICAL SKILLS

Backend: PHP, Laravel, CodeIgniter, Node.js, Python, Django, Express, REST APIs, SOAP APIs

Frontend: JavaScript, TypeScript, Vue.js, React.js, Next.js, Tailwind CSS

Data: PostgreSQL, MySQL, MongoDB, data validation, integration pipelines, geospatial mapping

Cloud and Tools: Git, Docker, AWS, Linux, Jest, PHPUnit, MQTT, WebSocket

PROFESSIONAL EXPERIENCE

Web Systems Engineer (GovTech) | DISKOMINFO DIY

Yogyakarta, Indonesia | Mar 2026 - Present

- Integrated an AI CCTV Monitoring Portal across 12 regional government sites through Indonesia's SPLP interoperability layer, enabling unified monitoring and cross-system incident detection.
- Delivered Survey, DTSEN, and Manunggal Raharja data pipelines; maintained approximately 99.9% uptime and reduced cross-system data inconsistencies by approximately 35%.
- Supported onboarding for 350+ DISKOMINFO and social-services operators using Laravel, Vue.js, Node.js, Django, MySQL, PostgreSQL, REST/SOAP APIs, and geospatial mapping.

Web Systems Engineer (GovTech) | PT Kencana Konsep Indonesia

Bandung, Indonesia | Oct 2024 - Jan 2026

- Led backend, frontend, and integration workflows for government systems using Laravel, Vue.js, Node.js, Django, MySQL, and PostgreSQL.
- Implemented REST/SOAP integrations, data validation, and pipelines that improved interoperability across agencies.

Web Systems Engineer | CV Milimeter Yogyakarta

Yogyakarta, Indonesia | Jun 2024 - Jul 2024

- Delivered a custom online course platform within a short project window using Laravel and MySQL.

Web Systems Engineer | PT BPRS HIK MCI Yogyakarta

Yogyakarta, Indonesia | Sep 2023 - Apr 2024

- Built and maintained Laravel and MySQL reporting workflows that reduced manual processing errors and operational friction.

IT Support | PT Maybank Indonesia Finance Tbk.

Yogyakarta, Indonesia | Jul 2023

- Provided technical support and troubleshooting to maintain branch operations during a peak coverage period.

PROFESSIONAL EXPERIENCE (CONTINUED)

Web Systems Engineer | PT ASI Pudjiastuti Aviation (Susi Air)

Pangandaran, Indonesia | Oct 2022 - Jan 2023

- Led engineering of a pilot operations dashboard with live aircraft telemetry, crew scheduling, flight logbook integration, and multi-site reporting for regional aviation hubs.
- Delivered the platform with Node.js, Laravel, Vue.js, MySQL, PostgreSQL, REST APIs, and geospatial visualization.

Web Systems Engineer (GovTech) | Secretariat of Sleman Regional Parliament

Sleman, Indonesia | Jan 2020 - Oct 2022

- Led backend, frontend, and integration work for a legislative management system using Node.js, React.js, PostgreSQL, and MySQL.
- Built REST APIs and data pipelines integrating legislative agendas, voting, and electronic reporting data to improve reporting and public transparency.

Web Systems Engineer | PT Syariah AI Amin Life Insurance

Jakarta, Indonesia | Oct 2018 - Oct 2019

- Built and maintained digital insurance systems using Node.js, Laravel, CodeIgniter, Android (Java), and MySQL.
- Integrated web portals and mobile applications through REST APIs for policy and claims workflows.

SELECTED PROJECTS

Susi Air Pilot Operations Dashboard: Real-time aviation operations platform for telemetry, scheduling, logbooks, and regional reporting. pilot.susiair.com

XIV Apparel: Custom WooCommerce storefront with product filtering, side-cart, guided checkout, OTP/WebAuthn authentication, QRIS payments, and Docker-based deployment.

Aetherlo: Enterprise IoT platform with MQTT/TLS telemetry ingestion, Go services, REST/WebSocket APIs, and PostgreSQL time-series data.

Lex Integrity: Privacy-first legal compliance analysis platform using the MERN stack and an offline local LLM. lex-integrity.vercel.app

AI and Data Projects: Indonesian speech-to-text, face recognition, pharmaceutical safety analysis, Javanese-language NLP, legal decision support, and offline Quran/Hadith semantic analysis.
